

# Gordon's School Geography Department Key Stage 3 - Curriculum Map

### Key Words:

Settlement, Population, Migration, Globalisation, Superpowers, Development, Environmental, Tectonics, Weather, Rivers, Coasts, Glaciation, Conflict, Rainforests, Fieldwork

## Core Skills:

Cartographic skills, graphical skills, numerical skills. statistical skills

# **Core Concepts:**

Place and space, Interdependence, Future and uncertainty, Time and Scale, Cultural understanding and diversity, Sustainability.

> Coasts How processes operate on coastlines and what landforms are produced

**Rising Superpowers:** India

A focus on human geography and the rise of emerging economies with the resulting consequences on India

GCSE

0

Japan What the natural and

human environments in

changing

Japan are like and how it is

Globalisation

and worse

**Tectonic Hazards** 

processes and hazards associated

with earthquakes and volcanoes

An overview of the physical

and their impact on us

How this concept affects

the human and physical

world around us for better

**Environmental issues &** West End fieldwork

How the environment and climate can be affected by human activity and how it can be mitigated

Glaciation How processes operate in glacial and post glacial areas and what landforms are produced

Year 9

#### The Geography of Conflict The geopolitical causes of conflicts in the world and the possible future outcomes and consequences

# **Tropical Rainforests** - The Amazon What the natural ecosystem and

human environments in the Amazon are like and how they are changing

Weather and climate

An introduction to the physical science of weather and climate including climate change and the implications for humanity. Includes microclimates fieldwork

**Population and migration** 

The causes of demographic

challenges they pose

changes and migration and the

# Passport to the World

purpose and meaning of geography as well as introducing core ideas and the UK context.

# Map Skills

How to use map skills which are important throughout geography and in wider life

Year 8

Antarctica; the frozen continent

#### Rivers How processes operate in rivers and what landforms are produced

To learn about Antarctica, its resources and natural and human environment here

# Weather Hazards An overview of the physical processes and hazards associated with weather and the impact on us

# The Development Gap

A focus on human geography relating to international development and the econom inequalities in the world

## Settlement and urban challenges

How urban areas change and their effects
