

SUPER SPEED STUDY SKILLS

Romeo & Juliet

Opening of story we meet characters: Romeo and Juliet. We also find out where the story is set: Verona in Italy.

Every great story has a dilemma; the point of the story, which here is love. The problem in R&J is that they will never be allowed to be together as their families are enemies. Their feelings are that they want to get married no matter what.

The 1st part of the story is very exciting because there is lots of fighting and blood! There is also a great deal of suspense because Romeo's best friend is killed by Juliet's cousin. The teaser is that we don't know if Romeo is going to take revenge and kill someone in Juliet's family. The big mistake is that Romeo let's his anger run away with him and kills Juliet's cousin and is banished from the city.

In the 2nd part of the story the main event is that Juliet is distraught so she goes to the Friar for help, he gives her a special potion so that she can fake her own death and escape to be with Romeo. Then it all gets very exciting because Romeo actually thinks that Juliet is dead and so he poisons himself. There is often a big brave hero in a story and in a way it this story's hero is Juliet because she loves Romeo sooooo much she stabs herself so she can be with him in heaven.

Every great story has a resolution and here we can see that Romeo and Juliet's families are so moved by the love and death of these teenagers that they end the war between themselves and promise to be friends. Shakespeare loved to have a moral to his stories and here it is that true love conquers all and that we should learn to forgive and forget.

The Story Method

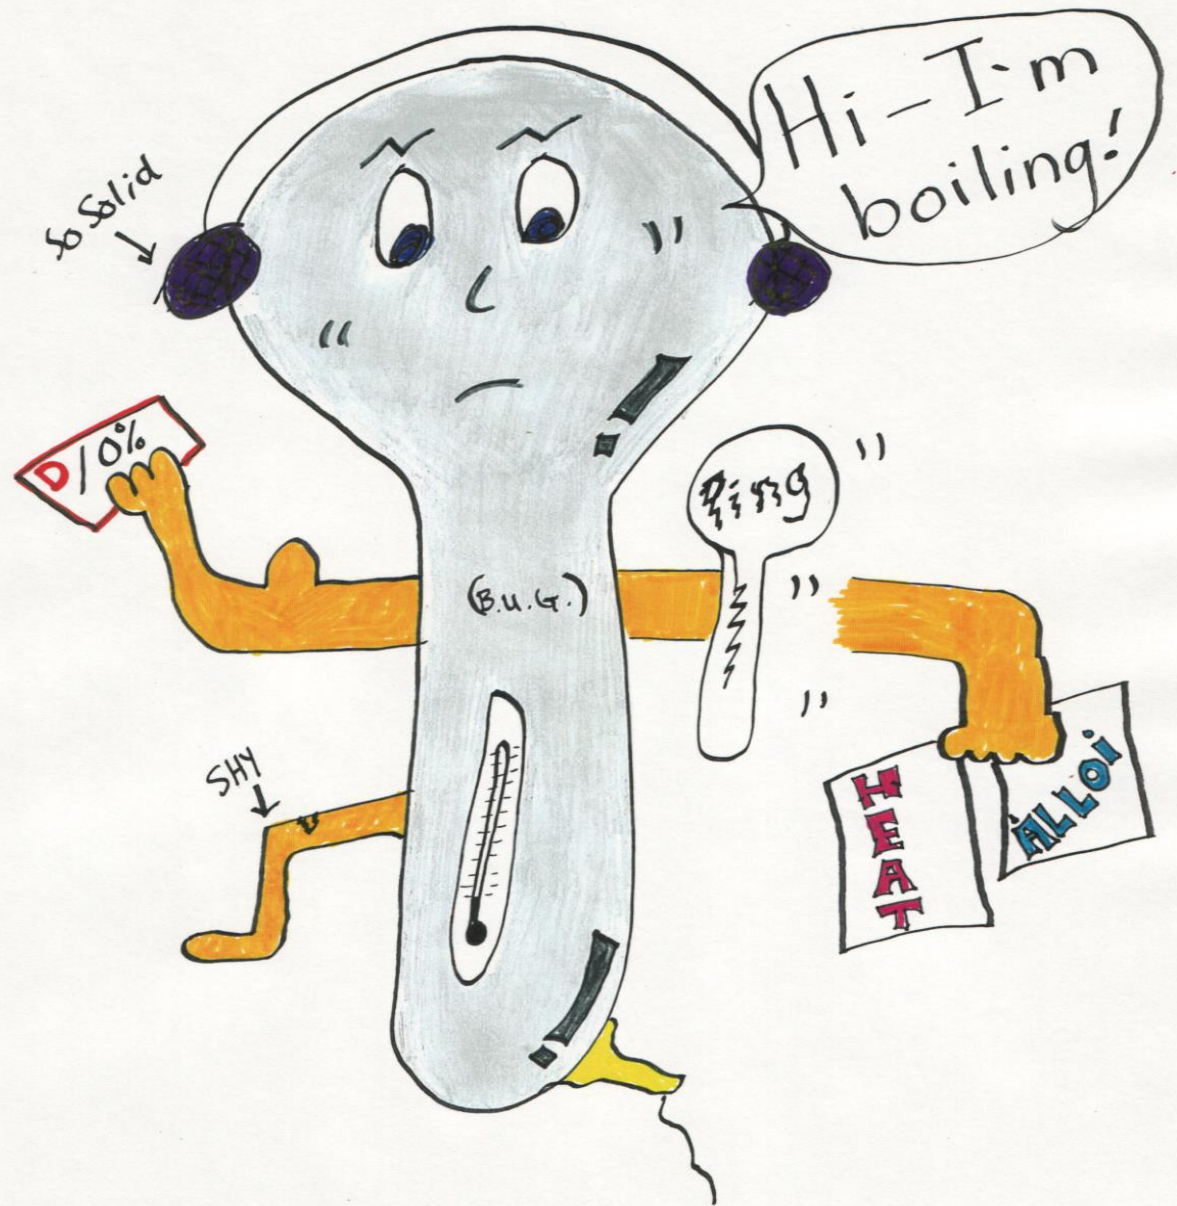

- ❑ We used the story method to help us to remember the first people in Britain.
- ❑ This works well for anything you need to remember in order or a whole list.
- ❑ When we used actions, **Multi Sensory Learning**, it was even easier for us to remember!

Summary Posters

- ❑ We used Summary Posters to help us remember the energy sources.
- ❑ The use of **Dual Coding**, using pictures as well as words, helped our brains to learn and recall the information effectively.

Our range of Secondary Programmes:

- **Super Speed Study Skills**
- **Exam Busters**
- **Goal Mapping**
- **Mastering Student Motivation**
- **Resilience**
